the dean of the Faculty*

The Memorandum of Understanding describes a commitment of the parties introduced above. Its objective is to make a major step towards cooperation on joint projects using and applying information and communication technologies. Several realized projects and cooperation give the signers the tool to forward their objectives to enhance and enrich the cooperation between academic community and industry.

Objectives of cooperation:

Information and communication technologies integrated into broad spectra of activities are contributing to develop and achieve signers' goals and improving their development. Signers cooperate on scientific and research projects with specific targets on applied research in commercial sphere.

Signers cooperate on open and agreed basis. Open cooperation between academic community and industry increases potential of economic growth and enlarges and enhances the knowledge base and experience of experts of the signers. Open cooperation functions for signers besides increased income as a platform for applying the knowledge and sharing the experience.

It is agreed that for joint projects both parties delegate experts competent in the subject of the respective projects defined by the specification of the interest.

Signers verify that the both parties may mutually employ the experts and hire them for the projects in scope of their cooperation.

In Prague 14.10.2010

Ing. Michal Pajr

prof. Ing. Pavel Tvrđík, CSc.
